## SUSTAINABILITY AND CLIMATE

Humankind can no longer afford to ignore Sustainability and Climate considerations in our quest for social and economic development. Pursuit of the Sustainable Development Goals-2030 and the fight against climate change require a fundamental rethinking of **policies and strategies, technologies, institutional frameworks, and financing mechanisms**. This is possible only through active collaboration between multiple stakeholders including government, regulators, policy think-tanks, industry, academia, scientific community, technology providers, and financial institutions.

Over the past years, MaGC has been assisting its clients – in the **government, private, and not for profit sectors** - design and implement innovative solutions addressing multiple dimensions of sustainability and climate action. MaGC has developed an **internal team of experts** with relevant qualifications and certifications, and a **wide network of specialist institutional partners**, to cater to specific client needs. With close to three decades of experience in public sector and corporate advisory, we are able to advise our clients across policy, process, people and technology dimensions of sustainability and climate projects.

### What we offer?

MaGC provides a suite of services as part of its 'Sustainability and Climate' offering, which include:

- **Design and preparation** of climate programs and investment projects tapping a variety of concessional funding instruments.
- **Structuring of financing models** for climate-oriented projects, complying with specific requirements of multilateral and bilateral agencies.
- **Technical, financial, and economic appraisal** of green investment projects.
- **Due diligence and valuation of businesses** operating in the Sustainability and Climate space.
- Implementing **business responsibility and sustainability reporting** mechanisms.
- Undertaking related diagnostic **studies and assessments** such as GHG emissions inventory, lifecycle assessment, fiduciary assessment of implementing entities, and business process reengineering.
- **Training** on sustainability reporting and climate finance.

## Past Experience

- ✓ Program preparation for a **Program Budget Support** for the Euro 100 million Himachal Pradesh **Disaster Risk Reduction and Preparedness Program** for the French Development Agency.
- ✓ PFM (public financial management) advisory for a Program Budget Support of Euro 100 million for **biodiversity conservation and climate resilience** in West Bengal State in India for the French Development Agency.
